

Produced by Shigeo Fukuda - the Director of the Japan Graphic Designer Association, a total of 146 designers representing 22 countries, and 200 designers from within Thailand, participated in the project. The theme is "Environment: the wind of love to the world..."

Marugame UCHIWA are tools of cooling, essential for withstanding the hot Japanese summer. It is our hope that these UCHIWAs, used in the spirit of international love, will reduce the use of air conditioning, and in that way help to alleviate the problem of global warming.
